### **S.L. Variant Speed Loaders Are Now Available In the U.S.**

The S.L. Variant speed loader, the speed loader most preferred by revolver pros, is now available in the United States after an absence of many years. The S.L. Variant earned its reputation as the most secure and positive-loading speed loader in both competitive and real-world venues.

The S.L. Variant holds its rounds more securely than any competitive speed loader. No more reaching in a pocket to find loose rounds accompanied by an empty speed loader! The S.L. Variant is also the most positively-loading speed loader on the market because the rounds are forced out with a "punch" due to the loaders individually spring loaded chambers. The large Sport Grip attachment (not shown, sold separately) simply screws onto the Variants threaded end, giving the shooter a better purchase and more secure loading. The Sport Grip is also useful to people with bad or arthritic hands.

Some of the world's top rated revolver instructors refuse to use anything but the S.L. Variant. *"Anyone serious about self defense should own the S.L. Variant"* -Michael deBethencourt, lead instructor of Snubtraining.com.

The 5 shot version will fit any J-frame compatible revolver while the 6 shot model will fit any K-frame compatible revolver. The 5 and 6 Shot Variants can be purchased at [bobmacs.com](http://bobmacs.com) for \$30.00.

For more information or to place an order, visit [www.bobmacs.com](http://www.bobmacs.com).

#### **About Bobby Mac's – "Just Snubs"**

Bobby McEachern is a custom holster maker who is focused on snub revolver holsters and spare ammunition carriers. He is working daily with the best known self-defense snub instructors and extreme close quarter (EQC) fight trainers. He builds hand crafted versions of the practical designs that these professionals demand and offers them to the legally armed snub owner.
