

Union Station Massacre

Designer: Claude Werner, www.firearms-safety-llc.com

Date: 3/18/2004

Scoring Method: Vickers

Rounds: 12 (minimum)

Target Description: 3 Standard IDPA targets, one non-threat target

Target Distances: 3 – 7 yards

Starting Position: Shooter facing toward car, hands naturally at sides,

Start and Stop Signal: Start is standard Beep; Stop is last round fired

Scenario Description: While escorting a Federal prisoner to Leavenworth Penitentiary on June 17, 1933, four agents of the Bureau of Investigation, later called the FBI, an Oklahoma Police Chief, and two Kansas City detectives were ambushed outside Union Station in Kansas City by several men armed with submachineguns and shotguns. The criminals fired relentlessly with shoulder weapons into all sides of the agents' car. The result was truly a massacre. Both detectives, the police chief, and one BI agent were killed, along with the prisoner. Another agent was permanently crippled and the third was wounded. The fourth agent escaped injury by taking cover under the bodies of men already shot.

Procedure:

On signal, shooter will engage T1 and T2 with two shots each, in Tactical Sequence. Shooter will then move to P2 and engage T3 with two shots. Shooter will then move to P3 (the rear of the vehicle) and re-engage all targets with two shots each, in any order.
